Dhaval Mistry

Engineering Leader | Enterprise Technology & Cloud Transformation | Software Engineering | Applied AI & Intelligent Automation | Global Team Leadership

Jurupa Valley, California, United States

Summary

I’m an engineering leader with 20 years of experience leading enterprise technology modernization, software engineering, cloud transformation, and intelligent automation across banking and fintech.My strength lies in connecting business strategy with technical execution. I bring hands-on architecture experience together with engineering leadership to modernize complex systems, improve production reliability, and deliver secure, scalable technology solutions.Throughout my career, I’ve led globally distributed teams across the U.S., India, and China, working closely with business executives, product leaders, architects, and engineering teams to deliver enterprise transformation initiatives.My experience includes:- Leading core banking and payment platform modernization, including legacy-to-microservices transformation and enterprise API integration.- Driving Microsoft Dynamics 365 cloud migration and enterprise application modernization.- Designing cloud-native solutions using Microsoft Azure, microservices, and event-driven architecture.- Implementing AI and intelligent automation solutions to improve operational efficiency and customer experience.- Strengthening engineering delivery through DevOps, test automation, production reliability, and continuous improvement.I believe effective engineering leadership requires more than technical expertise. It requires clear priorities, strong execution, accountability, and the ability to connect engineering decisions to measurable business outcomes.My focus is on building capable engineering teams, modernizing enterprise platforms, and applying cloud and AI technologies to solve meaningful business problems.Core Expertise:Engineering Leadership | Software Engineering | Enterprise Architecture | Azure Cloud | Applied AI & Intelligent Automation | Banking & Payments | Digital Transformation | Microservices | API Integration | Microsoft Dynamics 365 | DevOps | Production Reliability

Experience

East West Bank

10 years 2 months

First Vice President - Engineering Manager

March 2022 - Present (4 years 8 months)

United States

Senior Engineering Manager

April 2017 - Present (9 years 7 months)

Led AI initiatives by integrating AI in Sales, Operation, and Services using Azure and modern AI frameworks, resulting in improved customer engagement and streamlined operations. Led large-scale engineering and transformation programs in a hybrid cloud environment, leveraging Azure networking to align banking operations with digital-first strategies and enhance operational efficiency. Oversaw cloud cost management and governance by implementing Azure Monitoring and Azure Security best practices, optimizing infrastructure spend and reliability. Replaced a legacy 20-year-old wire transfer system with FIS OPF, modernizing internal financial operations to deliver faster and more secure transactions, reduce maintenance costs, and improve overall system reliability. Modernized financial operations by adding new payment methods and automation, leading to faster transactions and fewer errors. Led development, QA, and IT triage teams in an onshore-offshore model, increasing delivery speed by 25% and improving product quality by enhancing communication, aligning cross-functional goals, and streamlining collaboration across global teams. Led career development initiatives by creating structured development paths, mentoring team members, and guiding professional advancement, resulting in improved team retention rates and skills enhancement. Designed and implemented microservice architecture for integration of core systems (FIS, Fiserv, Equation HK) using .NET Core and Web API, deployed on Azure Kubernetes Service for enhanced scalability and faster data processing. Championed Dynamics 365 migration to cloud, boosting application performance and business continuity. Established agile practices by managing backlogs, user stories, and sprint velocity through Azure DevOps and JIRA, leading to improved team efficiency and project delivery timelines.

Vice President - Software Development Manager

March 2020 - March 2022 (2 years 1 month)

El Monte, California, United States

Associate Vice President - CRM Specialist, Lead Automation Engineer
May 2018 - March 2020 (1 year 11 months)
