EXECUTIVE PROFILE

Engineering executive with 20+ years in software delivery and 9+ years leading globally distributed engineering organizations across the U.S., India, and China through managers, tech leads, and senior engineers. Delivers cloud modernization, payments and API platforms, enterprise observability, and governed applied AI in regulated environments. Builds leaders, raises delivery quality, and aligns technology with business outcomes.

CORE STRENGTHS

Engineering Leadership: Leading managers, tech leads, and senior engineers; coaching; performance management; global delivery

Strategy and Delivery: Technical roadmaps, prioritization, dependency governance, release discipline, executive communication

Architecture: Cloud-native, microservices, event-driven, API platforms, integration, data platforms

Reliability: Observability, incident management, root cause analysis, production operations

Applied AI: Governed AI workflows, agentic engineering practices, human-in-the-loop decision support

Domains: Banking, payments and wire, CRM, education technology, public sector, insurance, healthcare inventory

SELECTED ACHIEVEMENTS

- Wire platform: directed FIS OPF and SWIFT modernization supporting about $1.5B in daily transaction value
- Payments: led modernization across six origination channels on Azure
- Delivery: improved cross-functional delivery speed 25%
- Reliability: reduced mean time to recovery with enterprise observability
- Platforms: led Salesforce to Dynamics CRM replacement and CRM 2016 to Dynamics 365 migration
- Applied AI: delivered branch-call workflow, borrower-risk decision support, Copilot agent workflows, and QE knowledge agent
- Leadership: 9+ years leading managers, tech leads, and senior engineers across three countries

TECHNICAL SKILLS

Cloud and Platform: Azure, AKS (Kubernetes), Azure Service Bus, Azure Functions, Cosmos DB, Azure Cache for Redis, Application Insights

Languages and Frameworks: C#, .NET, ASP.NET MVC, Entity Framework, WCF, JavaScript, jQuery, Python, FastAPI, React; legacy VB6, VBA, WPF, Silverlight, UWP

APIs and Integration: REST APIs, Open Banking APIs, microservices, event-driven architecture, BizTalk, Scribe, TIBCO, SSIS

Data: SQL Server, Oracle, PostgreSQL, MySQL, SQLite, PL/SQL, SSIS, SSRS, SSAS, Business Objects, data migration

Enterprise Platforms: Dynamics 365, Dynamics CRM 4.0 to 2016, Salesforce migration, FIS OPF, SWIFT

Observability and Operations: Grafana, Splunk, KQL, Application Insights, incident management, root cause analysis, runbooks, production support

AI and Automation: Azure AI Foundry, Azure OpenAI, Azure AI Speech, GitHub Copilot agent workflows, RAG, agents, MCP, explainable decision support

Compliance and Controls: Regulated banking delivery, banking privacy rules, release discipline, dependency governance

Delivery Tools and Practice: Jira, Confluence, GitHub, Visual Studio, Agile, Scrum, SDLC, release management, architecture and design reviews

PROFESSIONAL EXPERIENCE

Senior Engineering Manager (FVP), East West Bank, Pasadena, CA **Apr 2017 - Present**

Regulated financial institution | payments, wire, APIs, cloud modernization, observability, applied AI

- Lead globally distributed engineering organizations across the U.S., India, and China through managers, tech leads, and senior engineers
- Led payment-flow modernization across six origination channels on Azure (C#/.NET, AKS, Service Bus, Functions, Cosmos DB, Redis)
- Directed FIS OPF and SWIFT wire-platform modernization supporting about $1.5B in daily transaction value
- Delivered Open Banking API initiative for commercial clients
- Led CRM 2016 to Dynamics 365 migration
- Built enterprise observability with Grafana, Splunk, Application Insights, and KQL, cutting mean time to recovery
- Improved cross-functional delivery speed 25% through ownership, dependency governance, release discipline, and automated quality
- Delivered AI-assisted bank branch-call workflow using Azure AI Speech and Copilot
- Built explainable borrower-risk decision support with a preliminary 1-to-10 rating and human review
- Introduced GitHub Copilot agent workflows and a QE knowledge agent over Jira and Confluence
- Partner with Product, Architecture, Security, Operations, and vendors on roadmaps, risk, and release readiness
- Run performance management and career development across regions
- Coach managers and senior engineers; set standards for design, delivery, and documentation

Senior CRM Specialist / Solution Architect, Sunplus Data Group Inc. **Nov 2012 - Apr 2017**

Clients: Bank of the West, Ascend Learning (NASM), State of Wisconsin DATCP

- Led Bank of the West CRM 2015 rollout across all lines of business, replacing Salesforce and its integrations
- Monitored Salesforce-to-Dynamics data migration through QA, UAT, and production release
- Redesigned Ascend Learning NASM CRM 2013 application; set dev, QA, stage, and production deployment standards
- Replaced integration tooling with a queue-based mechanism; set code quality and documentation processes

- Built State of Wisconsin DATCP consumer protection application from scratch (Nov 2012 - Dec 2014)
- Migrated CRM 2011 to 2013 on premises; delivered MVC and jQuery portal for external users
- Delivered WCF data-sharing service, SSRS reports, and SSIS packages with U.S. Bank and Wisconsin Department of Administration
- Supported banking privacy rules, SSRS reporting, and iPad app for Bank of the West MD Back Office
- Reviewed vendor designs and supported QA, UAT, and production releases
- Took ownership of NASM CRM application; baselined requirements as user stories
- Delivered DATCP plug-ins, workflows, unit tests, and end-user training
- Built Windows 10 UWP personal assistant app in C# with SQLite and encrypted local storage

Senior CRM Specialist, Synechron, Pune, India **May 2011 - Oct 2012**

Asurion Subscriber Billing (CRM 4.0)

- Served as tech lead and assistant project manager; ran round-the-clock operations and L3 support
- Integrated ASPX pages with .NET and TIBCO services; built plug-ins and workflows; trained the team

Senior Software Engineer, Tata Consultancy Services, Bengaluru **Sep 2010 - May 2011**

AGCS Alliance ARCNet, property insurance (Germany)

- Delivered CRM 4.0 customization, plug-ins, database migration, and SSRS reporting

Software Engineer, eInfochips Ltd., Ahmedabad, India **Feb 2006 - Jul 2010**

Client engagements: Contech Engineering Solutions (Cincinnati), Innerspace SpaceTRAX

- Implemented Merlin CRM 4.0 for Contech: Scribe data loads, order scheduler into Great Plains, SSRS and SSAS cubes
- Served as on-site coordinator and DBA; administered BizTalk Server 2006 R2, replaced DTS packages, and trained developers
- Built SpaceTRAX hospital cath-lab inventory web app with RFID and barcode capture, 11-layer n-tier design, BizTalk integration, and Oracle tuning
- Built ESOP employee stock options portal in ASP.NET and Oracle; automated audio-video testing with VBA
- Fixed defects in a VB6 and Oracle 9i clinical information system for Vignette; built a VB6 ActiveX surveillance plug-in

CERTIFICATIONS

Microsoft Certified: Azure AI Cloud Developer Associate (AI-200) and **Azure AI Apps and Agents Developer Associate (AI-103)**

Microsoft Certified: Azure AI Fundamentals (AI-900) and **Azure Fundamentals (AZ-900)**

Microsoft Dynamics CRM 4.0 Customization and Extending | **Oracle 9i OCP** SQL (1Z0-007)

EDUCATION

- **Master of Computer Applications (MCA)**, Gujarat University, India
- **Bachelor of Computer Applications (BCA)**, South Gujarat University, India
